Not much headway was made in either direction, so far as values are concerned, on the Cotton Exchange to-day. After a quiet start, nt a decline of 162 points, the market showed more or less irregularity, but raillied later in the forencom, and for the rest of the day exhibited a generally healthy undertone, closing steady at a net gain of 234 points. The initial weakness grew out of unfavorable market as well as political news from Europe. Longs were made additionally nervous by reports that rains in the Southwest had been beneficial. As the session were along subsequent information developed entirely new ideas as to the effect of the rains in the Southwest, it being stated that the moisture had not only come too late, but had actually done considerable damage, where heavy. There were reports of weakness in the southern spot market, but reports from the principal points denied this, and stated that the firmness continued, with prices unchanged to 1-16c. higher, and a good business doing.

As a result of a recent acts of the Central Traffic Association, notice has been given of an advance in rates on grain and grain products. A circular has been issued with a new schedule of rates. The car-load rate on onts and its products, effective on legal notice, and expiring at midnight September 17th, is on a basis of 15 cents per 100 pounds from Chicago to New York, from all points in the Central Freight Association territory to points east of the western termini of trunk lines. This rate is not to be scaled from points east and west of Chicago, unless initial interested railroads individually so elect. On September 18th rates become effective as follows from all points in Central Freight Association territory to all points east of

nelped on the decline by large sales for short account.

The highly speculative Industrial specialties showed the most serious losses, the opening sales showing anywhere from 2 to over 5 points clipped from Saturday's last prices for pretty much all of the active Industrials. The New York municipal stocks—Sugar, Tobacco, the Iron and Steel stocks, and the so-cailed Flower stocks—led in the decline. Rock Island, as a member of the latter group, fell 34. Declines in the railroads otherwise were not as violent as in the Specialties, but extended very generally to between 1 and 2 points.

RALLIES IN MANY STOCKS.

The bears were somewhat dazed by their own success, and almost immediately proceeded to take quick profits by buying to cover shorts. Rallies of 2 to 3 points resulted in many stocks. But before noon pressure was renewed, when a deluge of Brooklyn Rapid Transit was poured on the market. The New York Traction and Gas stocks moved in close sympathy. Brooklyn Rapid Transit dropped an extreme of 94, Metropolitan one of 54, Consolidated Gas one of 7, Manhattan one of 34, Third Avenue one of 4%, and Brooklyn Union Gas one of 6. The lowest prices of the day generally were touched on this movement, St. Paul extending its loss to 24.

The very violence of the movement invited some recovery, and soon after 1 clock prices generally had turned upward. Prices of the Specialties recovered from 2 to over 4 points. The absorption of railroad stocks became quite conspicuous, New York Central especially moving up 34, from the lowest, and many others rallying from 1 to 2 points. Best prices were not maintained, and the market closed easy.

EASING OF MONEY RATE.

EASING OF MONEY RATE. EASING OF MONEY RATE.

The late rally in prices was assisted by an easing of the rate for call money to 7 per cent, after a ruling of the latter at 10 per cent. A sharp drop of ½ per cent. in the actual rates for demand sterling and cable trensfers, and the marking down of posted rates half a cent also had an influence in relieving the strain on the stock market. The October coupons of United States 4 per cent, bonds of 1907 were payable to-day at the Sub-Treasury, and some slight relief was afforded to the money market by that means.

No reliable estimate is possible of the extent to which loans were liquidated to-day, but that repayments to the banks were very heavy is the testimony of all

Mr. Dunne went from the ship to the home of his friend, C. B. Dillingham, No. 20 west Twenty-fourth street, where a reporter found him. And, strangest of all, MF. Dunne proved his true humor by not saying a funny thing.

"It's strange to be the interviewed and not the interviewer," he said. "I've been a newspaper man so long in Chicago that I can't understand not asking the questions myself instead of answering them. And talking of interviewing, you ought to see the way the Britons do it.

"Their papers are new at it, and their main idea is to affect the breezy, brisk way about it, which they imagine is part and parcel of every interview. They

Crop Figures for the Census,
WASHINGTON, D. C., September 18,—
Special effort is being planned by Statistician Fowers to secure full statistics of agriculture in the South. The law requires the crops and products only of 189 to be taken, but they cannot be so taken until June 1, 190. As many of the great crops of the Gulf and South Atlantic States were mark sted in February, March, and April, of 1839, the growers will be called upon to furnish statistics thereof, which will be over one year old when the enumerator arrives. The census officials are using several channels to urge the necessity of producers being prepared to meet this difficulty, because, in the absence of much preparation, a correct and full exhibit of southern products will be impossible. Director Merriam, while determined to give to the Southern States everything that belongs to them at any cost, suggests that such a determination can be successfully carried out only in case the people cordally and universally co-operate with the census officials to that end.

CHATTANOOGA, TENN., September 18.—General H. V. Boynton, president of the Chickamauga Park Commission, announced to-day that the government has purchased another large tract of land on Missionary Ridge, to be added to the Chickamauga National Park. The place purchased is the Halloway Farm, where a number of the generals had headquareters.

Creek.

The Charleston (W. Va.) Courier says the miners' strike in the New river coal region has assumed considerable proportions, though there are a great many of the miners still at work. The order to strike seems not to have been generally obeyed. The miners who struck at the Sugar Creek and Macdonald mines, at the terminus of the Loup Creek branch of the Chesapeake and Ohio railway, have gone back to work, they having been paid the advance of 5 cents per ton demanded by them.

The difficulty, it appears, is that the operators cannot run their mines and pay the additional 5 cents as long as the selling price of their coal remains what it is now, and there is no reduction in freight rates. These operators are now paying 40 cents a ton, or 6 cents more than is paid by the operators at Sugar Creek and Macdonald, even after the increase of 5 cents has been granted. The coal on Loup creek is so much more easily mined than that on the New river that the men can make more at work in those mines at 35 cents than they can at 40 cents on New river. This places the Loup creek operators at a great advantage over the operators on the New river. What seems to be needed is a readjustment of prices and freight rates.

The Advance in Rates on Grain.

On export shipments of origin and wheat, the politons, they for Chicago and Chleago junctions, barley, corn, rye, and wheat, it cents; Dubuque, inclusive, barley, corn, rye, and wheat, 11-3 cents; oats, 16 cents;
